EXPERIENCE

Frontend Developer2025 – 2026

Miler Freight & Logistics Company

Kansas City, Missouri, USA

- Developed and maintained responsive web interfaces for logistics and freight management systems.
- Collaborated with backend developers to integrate REST APIs for tracking and shipment data.
- Improved UI performance and user experience using React and Tailwind CSS.
- Worked with TypeScript to build scalable and maintainable frontend components.
- Tested APIs and workflows using Postman and implemented automated testing to ensure system reliability and performance.

EDUCATION

Software Engineering – Bachelor of Science2020 – 2025

Jijiga University, Jijiga, Ethiopia

Graduated with strong foundation in software development, data structures, algorithms, and system design.

CERTIFICATIONS

- Bachelor of Science in Software Engineering Graduated
- Programming Fundamentals (at Udacity).
- Artificial Intelligence Fundamentals (at Udacity).

INTERESTS

- Coding
- Reading
- Problem solving
- Learning Practical Skills
- Gym

ACCOMPLISHMENTS

- Designed and developed a single-page application (SPA) for a freight and logistics system with tracking and commodity price monitoring features.
- Applied modern frontend technologies to real-world logistics problems, improving system usability and workflow clarity.
- Created a full-featured expense tracker application to manage income and expenses with clear data visualization and user-friendly interface.
- Built an AI chatbot application capable of handling user interactions and generating intelligent responses for basic queries.
